

Specifications for Pressure Washing Services

The Contractor shall provide all labor, materials, equipment, supervision, and any other requirements to pressure wash surfaces (Ground level and/or vertical) for Georgia State University (GSU) as further described below.

Pressure Washing Services:

- Pressure washing will consist of cleaning all exterior building surfaces, overhangs, and window ledges. In addition, all surrounding walkways in and around the building will be included.
- Contractor will utilize cleaning solution washing and clear water rinsing both using pressure washing equipment.
- Regarding any pavers, GSU personnel will investigate prior to creating the work order to determine if they will be included in the scope or not. This is dependent upon the underlying surface.
- Special attention and precautions are to be taken around windows, doorways, outdoor receptacles, and equipment to ensure safe passage to pedestrians, to avoid forcing water into or underneath doorways, windows, receptacles, and equipment at point of cleaning.
- If leaking is detected, contractor shall immediately contact the GSU Representative and remove any water accumulation and document the leaking area. The incident must be documented by contractor.
- Breezeways and sidewalks surrounding the buildings will be pressure washed directly after building pressure washing is completed.
- For heavy stain removals on breezeways, sidewalks, walkways or concrete surfaces, contractor will utilize mechanical and/or chemical action upon the surface to eliminate the stain.
- Contractors shall have technical knowledge to support correct application of pressure and any chemicals used in the pressure washing and window cleaning processes.

Spot Jobs:

- GSU and the contractor shall agree upon a scope of work and time to complete these spot jobs.
- Spot pressure washing may consist of spot cleaning building overhangs and window ledges, accidental causes, sidewalks, and any other problem areas.
- Contractor will use at minimum detergent washing and clear water rinsing.

Staging and Execution:

- Contractor will stage and execute the work in such a way as to maintain access to all exits and entrances of the building for all building occupants. Under no circumstances shall the contractor, even temporarily, block or restrict access to required fire exits and fire lanes.
- Contractor will ensure that all areas in which work is being performed are kept free of loose debris, trash, and empty containers. These items are not to be littering the surrounding area and shall be cleaned up daily and shall be disposed of at the contractor's expense.
- Trash in any bulk will not be placed in trash containers located at the building.
- Contractor employees are not permitted to use any university common areas, spaces, lobbies, classrooms, lounges, etc., for breaks or lunch periods.

References:

- Contractor should provide, with their bid, at least three (3) references for whom similar services (to include pressure washing of facilities at least 15 stories high) that have been performed within the last five (5) years, including name of company, point of contact and telephone number/email.

Background Checks:

- Given the close, continuous interaction with the State Entity community, the State Entity requires the Contractor to perform background checks on personnel assigned to perform work on State Entity's property and residence halls per the State Entity Contract.
